

Amendments to the Specification

IN THE WRITTEN DESCRIPTION

Please replace paragraph [0034] with the following amended paragraph:

[0034] Figure 4 illustrates a locking device 3a ~~which has for a mounting system 1a that includes~~ a lock 4a having two side locks 7a. The lock 4a and the side locks 7a are illustrated in a locking position. For unlocking, the side locks 7a are first driven linearly into the lock 4a, the lock 4a can thereafter also be driven back linearly into the locking device 3a ~~by the operating means 6a~~. The side locks 7a and the lock 4a can be moved by a ~~not~~ illustrated modification of the operating means illustrated in Figures 6 and 7.

Please replace paragraph [0035] with the following amended paragraph:

[0035] Figure 5 illustrates a locking device 3b ~~for a mounting system 1b~~ in which the lock 4b carries out a linear locking movement, whereas the side locks 7b are supported for an arcuate movement to achieve the locking. Here, just like in Figure 4, a fixed succession of locking movements is needed in order to achieve a safe locking and unlocking. The operating means 15b for creating a combined arcuate and linear movement are illustrated in Figures 6 and 7.
